Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Receipt is acknowledged of the amendment after final and remarks filed
03/30/04.

Applicant's request for reconsideration of the finality of the rejection of the last
Office action is persuasive and, therefore, the finality of that action is withdrawn.

The rejection under 35 USC 102(a) over D'Antonio is hereby withdrawn in view of
applicant's amendment.

The obviousness-type double patenting rejections are hereby maintained over
10/443,361, but is withdrawn over 09/606,909.

The following is a new rejection of the claims:

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that
form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 1615

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 85, 90, 91, 95, 96, 97, 99, 102, 106-108, 110, 113, 119, 121, 124-126, 129, 131, 134-136 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Pettis et al.

Pettis et al disclose a method for administration of a substance into the dermis as a bolus (see Abstract). Needles used in the claimed method are disclosed by Pettis et al at page 7, lines 15-28; and page 8, lines 1-3. Microneedle arrays are disclosed at page 2, lines 5-9; page 7, line 7. Delivery is into the dermis (see Abstract, page 1, lines 25-28). Heparin is specifically recited for delivery of this type (see page 8, line 9). The instant method is anticipated by Pettis et al.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 1615

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims Claims 85, 90, 91, 95, 96, 97, 99, 102, 106-108, 110, 113, 119, 121, 124-126, 129, 131, 134-136 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pettis et al.

Pettis et al disclose a method for administration of a substance into the dermis as a bolus (see Abstract). Needles used in the claimed method are disclosed by Pettis et al at page 7, lines 15-28; and page 8, lines 1-3. Microneedle arrays are disclosed at page 2, lines 5-9; page 7, line 7. Delivery is into the dermis (see Abstract, page 1, lines 25-28). Heparin is specifically recited for delivery of this type (see page 8, line 9). Therefore, those of ordinary skill would have found it well within their skill to claim the instant method of administration by delivering a substance into the dermis given the teachings of Pettis et al. They would have further expected similar therapeutic results from the administration of drugs intradermally. There are no unusual and/or unexpected results which would rebut prima facie obviousness. As such, it would have been obvious to claim administration of a substance intradermally, and further to expect similar therapeutic results from the administration thereof given the teachings of Pettis et al.
